I am currently an undergraduate going for my computer science degree with a minor in statistics. I have a deep interest in programming, networking and cyber security and looking to learn new skills, gain experience and to work with a great team to be a great team player and a better person.

EDUCATION

Computer Science
University of Canterbury

02/2018 - Present

Courses

- Internet Technology and Engineering
- Data and Network Security
- Web Computing Architectures
- Humans and Computers
- Computer Graphics
- Artificial Intelligence
- Data Mining

NCEA Level 1-3
James Hargest High School

2013 - 2017   *Invercargill*

TECHNICAL SKILLS

Python C++ JavaScript R C SQL Node.js CSS HTML OpenGL Apache Spark Express.js CPLEX Prolog Vue.js

SKILLS

Communicating
I worked at the Bonsai Restaurant where most of my co-workers did not speak English as their first language. To communicate with them, I needed to make myself clear so that we could work together and maintain a good understanding of what we were doing.

Always willing to listen and learn
I enjoy learning complex systems and am always determined to do my best to understand the mechanics behind how they work. I typically learn by listening to others and then solidifying the knowledge through practice. That said, when I make mistakes, I admit to them and always take responsibility for my actions.

Hard-Working
I have been told that I work hard by my lecturers and classmates. To be accepted into the University of Canterbury I had to pass all of the subjects that I studied in High School, including Calculus, Physics, Chemistry and Statistics (NCEA Level 3). To continue progressing through my degree I have to continue to work hard in order to pass my courses.

Teamwork
During my time at university I have worked in many groups for course projects which i have gained experience working with a wide range of people with different backgrounds and age groups as well as knowing how to be a team player.

PERSONAL PROJECTS

Events Website frontend and backend
- This was an academic project that helped me learn and gain experience in Vue.js, Node.js, SQL and JavaScript
- Gained an understanding of frontend and backend applications.
- Was a quite a big project so I gained experience my time management skills

Computer graphics asynchronous animations and ray tracing
- This was an academic project that helped me learn and gain experience in C++ and openGL

RIP Protocol
- This was an academic project that used Python to create the RIP protocol
- I have worked on this project with a partner so this has improved my communication, time management and social skills

WORK EXPERIENCE

Helper
Logan's Lawns
2019 - 2020   *Christchurch, New Zealand*
Logan Cane

Tasks
- Helped with moving heavy furniture and pulling weeds.

Dish washer
Bonsai Restaurant
2013 - 2018   *Invercargill, New Zealand*
Sushi shop/Japanese restaurant

Tasks
- Clean up tables
- Wash dishes
- Take food to customers
- If customers needed something I would get it for them
